DESIGNER FROST FILMS

IN-STOCK FROST FILMS

Over the last 30-years, property managers, general contractors, designers, home owners and building professionals have consistently asked for these films. Having stock means quick turn around!

W: 36" - 72"

SunTek 2M White Matte - 72"W

Specs: VLT 64%, TSER 34%, Glare Red. 28%, UV Red. 99%
A PET film, 2M White Matte is a Milky white, providing an acid-etched or frosted glass appearance. It is a classic look, offering great privacy and hides shadows well.

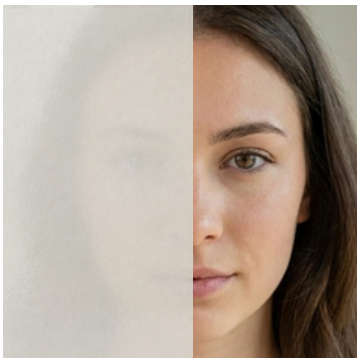

W: 48"

Print & Cut

LX Hausys - EP115 - 48" W

Specs: VLT 84%, TSER 24%, Glare Red. 40%, UV Red. 99%
A PVC-based film, greyish acid etched finish, allowing color and visibility for close objects, but more obscured privacy as objects are further away. Paper backing.

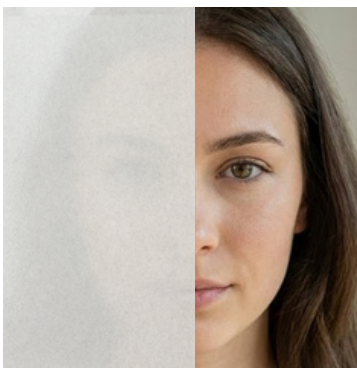

W: 48" & 60"

Print & Cut

LX Hausys - LC5570 - 48"W

Specs: VLT 75%, TSER 25%, Glare Red. 30%, UV Red. 99%
A PVC-based film, dusted (slight biege tone) in appearance. Pearl and embossed finishes. More opaque than EP115, but less than 2M White Matte. Paper backing.

W: 48" & 60"

Print & Cut

LX Hausys - LC5510 - 48"W

Specs: VLT 75%, TSER 25%, Glare Red. 40%, UV Red. 99%
A PVC-based film containing fine metallic pigments. Provides the appearance of premium sandblasted glass, with a subtle shimmer in the sun. Paper backing.

ReflecTech works with suppliers across Canada, United States and the world. Need a special film? We can supply and install that film for you!

Examples of Special Order Films

W: 54" Only

Solyx SX-1259 Wavy Glass

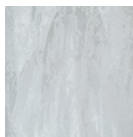

A unique "distortion" film designed to mimic the look of antique, hand-poured glass. This is a transparent but textured film. It "warps" objects rather than "blurring".

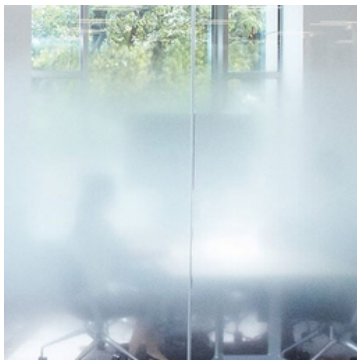

W: 12" - 60"

Solyx SXHE-39 Clear Feathered

This embossed film features a soft, ethereal pattern of flowing "feathers" that run vertically along the glass. Objects close to the glass are visible as blurred shapes.

W: 60" Only

3M Fasara Cloud - SH2FGCL

High quality polyester film for interior and exterior architectural glass decorations on showcases, partitions, windows. Common for commercial applications.

DESIGNER FROST FILMS CUT & PRINT CUSTOM FROST

ReflecTech has full color, including white, large format latex print capacity. We also have a large format digital plotter and a lamination table. How does this benefit you or your client? You have unlimited options for creating that perfect look in your home or office.

Cut & Masked Multi-Film Design

Features: LX Hausys EP115, LC5570, LC5510

The design to the left may not add privacy, but it solves a safety concern about clients running into glass.

Combining precisely cut shapes, different frost films and bare glass we can achieve unique and captivating demountable glass wall aesthetics. The different frost films add interest, texture and detail. Light refracts differently from each piece giving the illusion of movement.

Cut & Print Film Design

Features: LX Hausys EP115, White Print, Digital Cut

The design to the left combines lower privacy, branding and safety into one application.

Combining printing, cutting and on-site weeding allows one film to achieve a lot visually and functionally. The bands at the top provide focused privacy. The lower cut and print frost brand and define the space, adding coziness on the inside.
