

TRIPLE PANE & EXTERIOR FILM OPTIONS

We have selected 5 great exterior films with different traits so you can find the best suite of traits for your needs. What do you prioritize from your window film? Each film will provide slightly different aesthetics both looking in and out. There is a lot of information, we are always happy to help!

Picking the Right One

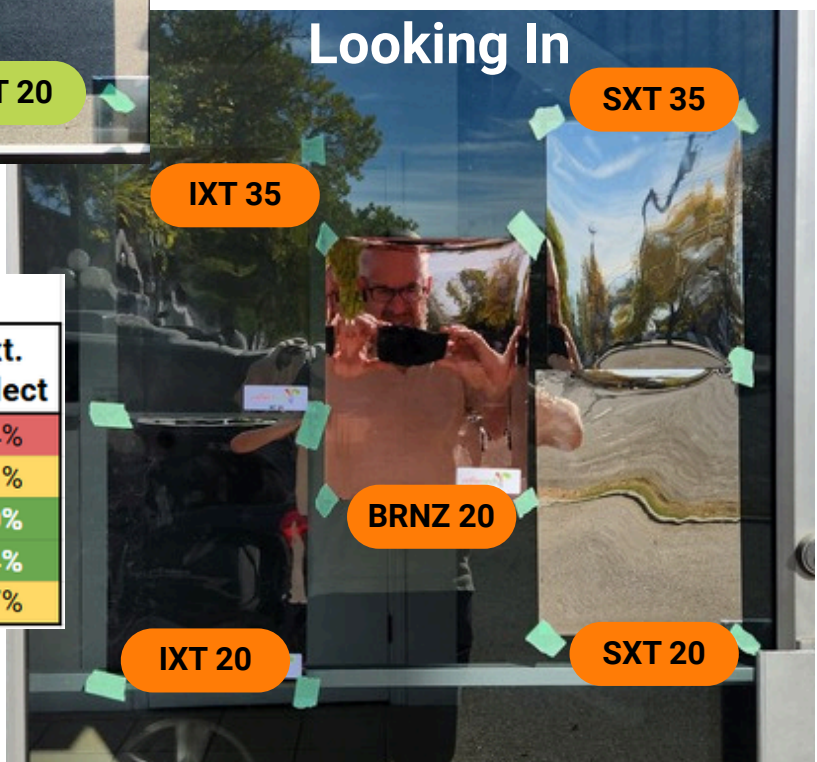

We found 4 traits that matter most to Edmontonians!

- Light** - how much light comes through.
- Heat** - TSER (Solar Energy) rejected
- Glare** - the glare reduction it provides
- Ext. Reflect** - light reflected outside

In the table below best is Green, Yellow is middle of the pack, Red is trailing the other options.

Exterior Film Traits				
	Light	Heat	Glare	Ext. Reflect
IXT 35	50%	41%	45%	14%
IXT 20	23%	64%	74%	31%
SXT 35	28%	71%	69%	50%
SXT 20	15%	81%	83%	64%
Bronze 20	17%	72%	75%	37%

All provide ~99% UV Protection, it is how Professional Grade films stay clear.

Warranty & Guarantee On Exterior Applied Films

We offer a 7-year warranty on vertical glass (90°), 2-year warranty on sloped glass. How did we come up with those time frames? Exterior applied glazing films are exposed to all of the elements and extreme conditions. Our manufacturers and suppliers dictate the warranty. Our Guarantee, if you are not satisfied with the end result, we will do what we can until you are satisfied.
